

Practical 2: Advanced documentation

Virgilio Gómez-Rubio

Introduction

In this practical you will learn:

- How to use Sweave and R markdown.
- How to develop vignettes for R packages.

Creating vignettes

1. Create a simple vignette using Sweave with the following:
 - The definition of the inner product.
 - A simple example
2. Include the vignette in the right directory.
3. Test the package with the new vignette (and fix errors).
4. Install the package and load the vignette.
5. Write another short vignette using R markdown and repeat the previous steps.
